

THE BLUETOOTH SWITCH

The ideal accessory to the LONEALERT App. The Bluetooth Switch is easy to set up, robust and reliable in tough environments, and has an extremely low power consumption.

Supports Android and iOS devices with Bluetooth 4. For security we recommend using latest version of operating systems and nothing older than Android 7.0 or iOS 10

How it works

The Bluetooth Switch is a discreet, wearable and lightweight Bluetooth button that is easy to set up and can be worn as a watch, on a lanyard, as a keyring or in your pocket. The Bluetooth Switch connects to the LONEALERT Access App. A simple press of the Bluetooth Switch will raise an alarm.

The Bluetooth Switch:

- Gives your loneworkers extra protection alongside the LONEALERT App.
- Allows lone workers to carry out their daily job role with added peace of mind, whatever their environment.

Bluetooth Connection

All the features you need to give your lone workers added protection via the LONEALERT app

IP67 RATED

Waterproof

Up to 1 metre for 30 minutes

Dust-tight

Dust tight. No ingress of dust

FALL DETECTION

Fall detection enables an alert to be sent automatically after a 60 second countdown. The fall detection feature enables the device to automatically send an alert if you fall.

DISCREET & LIGHTWEIGHT

The bluetooth device is the size of a poker chip - weighing only 8 grams, 32mm wide and 10mm thick.

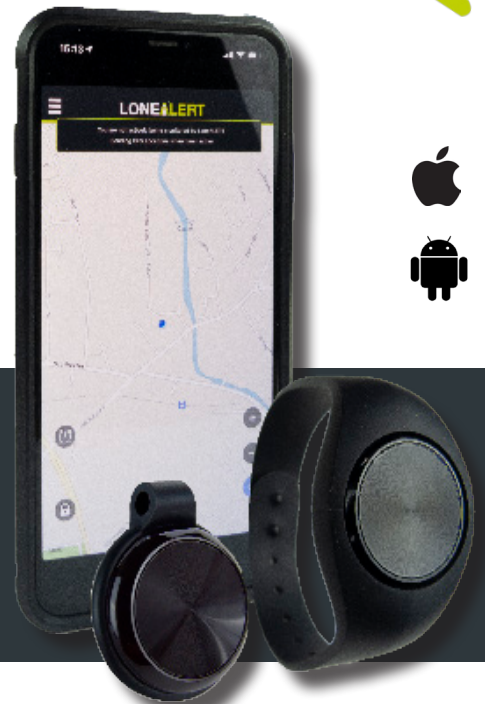

How far can the signal stretch?

The Bluetooth Switch must be in range of your smartphone to operate

If the device travels out of range from your phone, both devices will receive a notification

It has a **wireless range** of up to 75 feet indoors or up to 300 feet outdoors
